Remediation Expert Patrick Hunnewell Joins Matrix New World Engineering

Patrick T. Hunnewell has joined Matrix New World Engineering, Inc. as Senior Remediation Engineer

East Hanover, NJ - February 1, 2011

Matrix New World Engineering, Inc. (Matrix) is pleased to announce that Patrick Hunnewell has joined the staff as Senior Remediation Engineer. He has extensive experience and specializes in remedial construction and industrial and potable water treatment. Specifically, he has significant experience in the design, installation and operation of in-situ and ex-situ treatment systems using various technologies; the design and installation of wastewater treatment systems and potable water distribution; as well as the design and installation of recovery wells used to supply contaminated groundwater and soil vapor to treatment systems. He will also be overseeing soil excavation, transportation and disposal projects associated with soil excavation projects.

Mr. Hunnewell has been integrally involved in the construction of many civil and environmental projects and has almost two decades of experience as a Project Engineer, Project Manager, Construction Division Manager and most recently as the Chief Engineer while working for both engineering and contracting firms. He has New Jersey Department of Environmental Protection (NJDEP) licenses for underground storage tank closure and subsurface evaluation.

Patrick Hunnewell holds a BS in Civil Engineering from Drexel University and has attended Geology Field Camp with Indiana University. He is a resident of Peapack, NJ.

Matrix was formed in 1990 as a primarily environmental consulting firm serving a small base of clients. Today, Matrix provides, environmental, geotechnical and civil engineering and oil spill and survey services in the Northeast. The company has expanded into Phoenix, AZ and has satellite offices in the Gulf of Mexico region. Matrix is a premiere woman-owned engineering and environmental services, also certified as SBE and DBE.
